character design

We LOVE cartoons and comics. In fact, the evil mastermind of this company has a degree in computer animation. We spend a lot of time sketching characters and scenes, storyboarding and coloring character illustrations. If you have a project you're wanting a specific look for and you want a touch of evil eye candy in your project, look no further. We'd be glad to assist you!

Now for all the legal and important stuff...

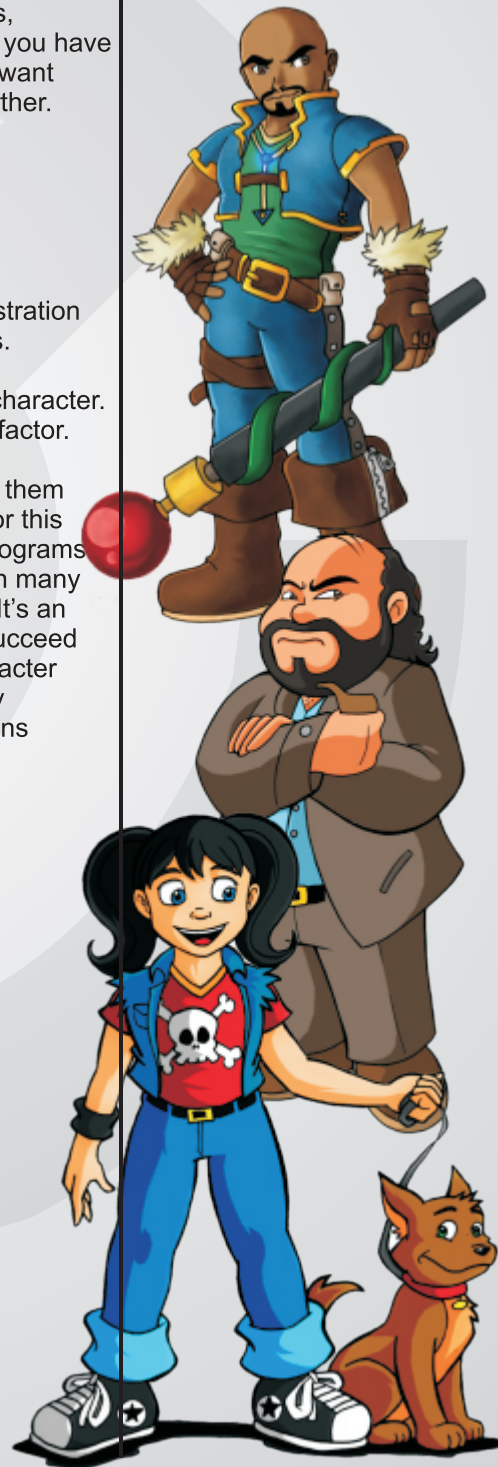

Our rates start at \$200 per character, and each character design includes all the concept sketches that go into getting to the final product, full color illustration of each character, character line-ups and color keys.

Price depends on how much detail goes into each character. The more detail, the more it will cost. Time is a key factor.

Your characters are your property, and you can use them in any way you chose because of that. Our prices for this service are such because you'll be using them in programs and publications that will be seen by many people in many areas, generating profit for you and your company. It's an investment, of your project and the desire for it to succeed and our time and creativity that goes into each character to make them stand out, one from another. The only other thing we ask is that you credit us for the designs wherever present.

Examples are shown to the left and right.
